## SUNDAY SCHOOL PICNIC.

# Springs Last Thursday.

The Union Sunday School Picnic at Howard Springs August 5th was an admirable success. The day was ideal, not to hot nor to cold, no dust or mud. The grounds were beautiful. The water, grass and trees, with clean sandy loam enough to delight the childmany years Mr. Bell has conserved the trees by keeping the fire out and protecting them in other ways, and nature has done her perfect work.

Each one of the five Sunday Schools of Crossville was well represented and a few were present from the Claysville School. In all, about 400, big, little, some one who counted. A nicer crowd The pitcher against them was entirely is not often seen. A sumptuous dinner was spread for all and all seemed to greatly enjoy it. Crossville ladies always do themselves credit in preparing dinner. I think sometimes they serve refeshments too much.

After dinner, as well as a while before, some pitched horse shoes, some played lawn tennis, and croquet. The boys ran races, and the girls jumped the rope, etc. till about 5 p. m. The Memphis to Bristol grade runs near the grounds and the crowd rode in buggies and wagons and an automobile or two As many as thirty boys and girls rode in one wagon tunished by C. G. Black, which was prepared with frame and straw.

The picnic was fruitful of much good. While the people of Crossville are never much in factions as is the case in places, such coming together of all churches on such occasions, diffuses and keeps alive general good will. # THE VITAL PROBLEM **AGRICULTURE**

By Peter Radford.

There is no escaping the market problem and the highest development of agriculture will not be attained until it is solved, for a market as necessary for the producer as land on which to grow his crop.

tutions have spent \$180,000,000 in the United States during the past ten ceed. years for improving soil production and improving seeds and plants, but very little attention and less money has been given to the marketing side of agriculture.

The problem is a monumental one experience and wisdom of the age upon it. It is a problem which the farmers, merchants, bankers, editors and statesmen must unite in solving.

The Farmers' Union stands for all there is in farming from the most scientific methods of seed selection to the most systematic and profitable plans of marketing, but does not believe in promoting one to the neglect 16th. of the other. We consider the work mercial agencies seeking to help us, and advice, but we believe that their influence should be extended to the marketing side of our farm problems

The neigh of a horse made Darius King of Persia, the six contending powers for the throne agreeing among themselves that the one whose horse should neigh first should possess the ering rapidly. kingdom. This ancient method of settling disputes among politicians could be revived with profit today. If our partisan factions and petty politicians could only settle their disputes by the neigh of a horse, the bark of a dog or the bray of a donkey, it would be a great blessing and would give our citizens a better opportunity to pursue the vocations of industry free from political strife.

Let those who pick political plums by raising rows and who flash swords dripping in the blood of industry understand that they cannot turn the public forum into a political arena and by a clash of personal aspirations at like homory and ston the plan.
